

Printing instructions for Tao of Taoism

Print EVEN pages first.

Insert pages into printer and ADD one piece of blank paper if last page is an odd number.

Print ODD pages second. (It should print the last page first on blank paper. Keep checking the pages. Only if there is a blank page in the first or second printing will you have any troubles.

Watch for BLANK PAGES and STOP PRINTER immediately.

Restart printer based on PDF page count: 1 to current page printing. RESUME PRINTING.

If you misprint on the back of a page, reprint that one page,, print the back side, then print the remaining second sides of your book from 1 to current page.

Print entire book in color.

Book printing margins are $.75$ " on all sides.

Use THICK PAPER, so that the second side doesn't "bleed through" to other side.

Only this PRINTABLE PDF has page numbers to make printing easier, if you have an error.

The BOOK COVER is a separate page from the book.

The REAR BOOK COVER is the last page of the PDF book.

I also recommend that you 3-hole punch AFTER printing because these holes can cause misprints.

Best wishes and keep your eye on the pages as they print.
If you cancel fast enough, you won't have to reprint any pages.

Richard Del Connor
